

WHAT IS CLAIMED IS:

1. A stretchable raschel-type warp knit fabric  
formed of a ground structure of polytrimethylene  
terephthalate fiber combined with elastomeric fiber laid  
in, wherein the knit fabric has the number of courses in  
a range from 100 to 200 courses per 2.54 cm, and a  
product of the number of courses and the number of wales  
per 2.54 cm is in a range from 4,000 to 8,000.

2. A stretchable raschel-type warp knit fabric as  
defined by claim 1, wherein the knit fabric is of a satin  
net structure.

3. A stretchable raschel-type warp knit fabric as  
defined by claim 1 or 2, wherein the elastomeric fiber is  
of a polyurethane type.
